

Metro Parking Master Plan

In 2015, LA Metro commenced the development of a comprehensive parking study for its roughly 24,000 spaces in over 50 locations throughout LA County. The Metro Transit Parking Program Master Plan included an assessment of the existing parking program and parking facilities with customer and agency outreach in order to provide recommendations for a new parking plan. After robust public input, the LA Metro Board of Directors approved the Master Parking Plan in early 2018. AVS as a certified SBE subcontractor was part of the project management consultant team working on community and stakeholder outreach.

AVS, as an SBE Prime Contractor is the current project manager leading a team of parking planning experts contracted through 2023 to provide as-needed Parking Planning Support Services to Metro Parking Management. Parking Planning Support Services include, Long Range Parking Planning, Parking Design, Parking Demand Modeling, Identify Parking Demand, Parking Plan and Design Review, Parking Data Analysis, Parking Rate Management.
